

2020 coding and Medicare payment for application of Collagenase SANTYL [◇] Ointment (250 units/g) in hospital-based outpatient wound care departments that bill under the Medicare Hospital Outpatient Prospective Payment System (HOPPS) CPT[®] code

SANTYL Ointment is the only FDA-approved biologic debridement agent. When debriding a wound via enzymatic debridement, there is one relevant CPT code:

97602 *Removal of devitalized tissue from wound(s), non-selective debridement, without anesthesia (e.g., wet-to-moist dressings, enzymatic, abrasion, larval therapy), including topical application(s), wound assessment, and instruction(s) for ongoing care, per session*

NOTE: Under Medicare, this code is only separately payable to hospital-based outpatient wound care departments that bill under the Medicare Hospital Outpatient Prospective Payment System (HOPPS).

NOTE: This code is only payable when it is the only method of debridement performed for a specific wound during a hospital-based outpatient wound care department visit.

HCPCS code

For tracking purposes, SANTYL Ointment, may be reported under HCPCS code:

J3590 *unclassified biologics*

Under Medicare payment rules, no separate payment will be made for SANTYL Ointment.

Revenue code

Following is the revenue code typically used to report the 97602 service:

051x *Clinic*

The most commonly accepted revenue code for J3590 is expected to be:

0636 *Drugs/biologics requiring detailed coding*

Many Medicare contractors require providers to include the name of the product on the claim form.

Medicare payment

Below is an overview of the 2020 Medicare nationally unadjusted average payment rate for CPT[®] code 97602. The Medicare payment rate for the CPT code is effective January 1, 2020 through December 31, 2020.

NOTE: Under Medicare, 97602 is only separately payable to hospital-based outpatient wound care departments that bill under the Medicare hospital outpatient prospective payment system (HOPPS) called the ambulatory payment classification (APC) system.

NOTE: 97602 is only payable when it is the only method of debridement performed for a specific wound during a hospital-based outpatient wound care department visit.

Medicare payment rate* for application of Collagenase SANTYL[◇] Ointment, when covered by the Medicare Administrative Contractor

Setting	Coding system	Code	Total Medicare allowable ¹	Medicare payment ¹	Patient copayment ¹
APC paid facility	CPT	97602 ²	\$174.71	\$139.77	\$34.94

* Payments are nationally unadjusted average amounts, and do not account for differences in payment due to geographic variation.

1 These rates do not account for the impact of the sequester

2 Packaged APC payment if billed on the same date of service as a HCPCS code assigned status indicator "S", "T", or "V". In other circumstances, payment is made through a separate APC payment.

Information on reimbursement in the U.S. is provided as a courtesy. Due to the rapidly changing nature of the law and Medicare payment policy, and our reliance on information provided by outside sources, the information provided herein does not constitute a guarantee or warranty by Smith & Nephew Advanced Wound Management that reimbursement will be received or that the codes identified herein are or will remain applicable. This information is provided "AS IS" and without any other warranty or guarantee, expressed or implied, as to completeness or accuracy, or otherwise. This information has been compiled based on data gathered from many primary and secondary sources, including the American Medical Association, and certain Medicare contractors. Physicians and other providers must confirm or clarify coverage and coding from their respective payers, as each payer may have differing formal or informal coding and coverage policies or decisions. Physicians and providers are responsible for accurate documentation of patient conditions and for reporting procedures and products in accordance with particular payer requirements.
